JUNE 3

Roughrider Electric's Annual Meeting in Hazen

In case you missed it...

North Dakota Career Tour

Juniors, sophomores, and freshmen, Roughrider Electric is excited to invite you to a unique opportunity that could ignite your future. Our two-day North Dakota Career Tour is set to offer a deep dive into the fascinating world of energy careers right here in our state. Visit our website for more information and to apply!

Planting safety tips

As spring approaches and fieldwork begins, our rural communities gear up for another busy planting season. During this busy time of year, staying aware, working carefully and understanding potential risks can make all the difference in keeping everyone safe. Read more on C6 of our local pages.

Read these articles and more in this month's issue of *North Dakota Living* or by scanning the QR code.

CALL BEFORE YOU DIG

Before you start digging, always call 811—this is a free service that helps protect you from accidentally damaging underground power lines, gas pipes, and other utilities. Remember, 811 operates independently from our electric co-op, but they are essential for your safety.

By dialing 811, a professional team will come out and identify where the public utility lines are located, so you can safely proceed with your digging project without putting yourself, your neighbors or essential services at risk. ND One Call is a free service that helps prevent accidents and costly repairs. Keep in mind, 811 does not locate private utilities like power that runs from your meter to your house.

Notify

Call 811 or make a request online by visiting: ndonecall.com.

Be sure to make the request three days before you start.

Wait

Wait three business days for a response to your request. Affected utilities will send a locator to mark any underground utility lines.

Confirm

Confirm that all affected utilities have responded by comparing the markers to the list of utilities the 811 call center notified

Respect

Respect the markers provided by the affected utilities. They are your guide for the duration of your project.

Dig

Be sure there is 18-24 inches on all sides of the marker before you begin to dig. If you can't consider moving your projects.
