January 2018

TO: Roughrider Members with Metered Yard Lights
FR: Roughrider Electric Cooperative, Inc.
RE: Notice of Changes in the Yard Light Program

Dear Member,

A review of our records indicates that you have a yard light that is currently on a metered yard light rate.

Changes were made starting January 1, 2018, because of North Dakota State Electrical Board Rule 43-09-16, which prohibits Roughrider Electric Cooperative line-workers from performing wiring activity on the member side of the meter. The energy meter has always been the separation point between Roughrider maintained equipment and the member's side of the electric service.

Roughrider will no longer be servicing these types of lights. You will find you will no longer be billed for a light on this month's bill. The light, wire and associated material (possibly including a pole) will be removed from our system records and donated to you.

If you wish to continue utilizing the yard light, and it is on a yard pole away from the meter pole or transformer pole and the light fails you will be responsible to maintain the light or find an electrician to maintain it for you. Electricians can also install poles for lights elsewhere in your yard.

For your convenience, Roughrider did a phone poll of area electricians currently willing to work on yard lights and that list is on the back of this notice.
